

Appendix A

Patient number: Name: Age: Gender: M / F Dep.: Ward: Date of Admission:	<h2 style="margin: 0;">Patient Information and Consent Form</h2> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> Doctor: _____ Signature: _____ </div>
<p>▪ What is Acupotomy therapy? Acupotomy therapy is the Oriental therapy peeling deep inside the lesions, using a bladed needle which has a thick flat-head and cylindrical body. Its purpose is to resolve chronic soft tissue injury and adhesion, recovering kinetic state. It is an efficient therapy for chronic accumulated injury.</p> <p>▪ Procedure method We use a specialized Acupotomy targeting to inner core muscles where tenderness appears.</p> <p>▪ Alternative treatment We can substitute general acupuncture and pharmacopuncture treatment for Acupotomy.</p> <p>▪ Expected results without Acupotomy Recovery from disease could be delayed.</p> <p>▪ Possible side effects and precautions Though we sterilize a needle and Acupotomy site directly, inflammation may possibly occur according to patient's immunity. From anesthetic, side effects including shock, malignant hyperthermia, convulsion, vomiting, dizziness, or allergic response can appear. On the day of the treatment, DO NO STIMULATE the Acupotomy sites by washing, taking a bath, or drinking. You are recommended to AVOID EXCESSIVE MOVEMENT for 3 days after treatment. You have to BE CAREFUL OF INFECTION on the Acupotomy sites, where sterilized gauze will be applied. This treatment has more possibility of infection than general acupuncture, and side effects including palpitation, dizziness, and hypotension may occur after treatment.</p> <p>▪ Please check if you are included</p> <ul style="list-style-type: none"> <input type="checkbox"/> You have central nervous system diseases <input type="checkbox"/> You have possibility of pregnancy <input type="checkbox"/> You have severe hypertension <input type="checkbox"/> You are taking antithrombotic drugs like Warfarin, Aspirin and else, OR you are suffering hemostatic disorder. <input type="checkbox"/> You have any surgery history or you are currently receiving treatment (Name of Disease :) <div style="background-color: #f0f0f0; padding: 10px; margin: 10px 0; text-align: center;"> <p>I received sufficient explanation about the Acupotomy treatment, and fully understand causable complications (inflammation, palpitation, dizziness, or hypotension) with Acupotomy. I agree to this consent and entrust the treatment to medical attendant.</p> </div> <div style="background-color: #e0f0ff; padding: 10px; margin: 10px 0;"> <p>▪ Dates : _____, 2019</p> <p>▪ Patient : _____ ▪ Signature : _____</p> <p>▪ Substitute (Relation with patient :) : _____ ▪ Signature : _____</p> </div> <p>-> For: <input type="checkbox"/> The patient could not comprehend this form due to somatopsychic disorder.</p> <ul style="list-style-type: none"> <input type="checkbox"/> The patient is underage. <input type="checkbox"/> It is obvious that this explanation could adversely affect the patient's condition. <input type="checkbox"/> The patient personally delegates right to consent to specific person. <input type="checkbox"/> Others(_____)
